

For a beautiful installation of decking materials, rely on EB-TY®. This system sets all deck boards to level and uniform heights. It makes work simple and beautiful:

- no scarring or fasteners visible
- only one EB-TY and one screw required at joist and deck board intersection
- all work is done from top inside
- spacing of deck boards is automatically set at 3/32"
- made from-UV resistant Polypropylene, which has a 100-year life

## Teak Decking

East Teak Fine Hardwoods, Inc. provides its own branded Admiral's Choice® Teak Decking, the world's finest choice for teak decking materials. This First European Quality (FEQ) Burmese teak is kiln-dried, surfaced four sides (S4S), eased on four edges (E4E), and available in tongue-and-groove (T&G) for porch planks or pre-grooved for hidden fastener systems.

Teak surpasses all other woods for any outdoor use. This is a result of the natural oils in *tectona grandis*, or true teak, which eliminate the need for preservatives and sealants.

Teak offers:

- a golden color, with dark markings and a straight grain
- a non-skid surface, thanks to a coarse texture that is smooth to the touch, with virtually no raised grain
- little maintenance needed
- the choice of finishing the wood to a preferred shade or simply leaving it to take on a natural silver-gray patina

Our own branded Admiral's Choice® Teak Decking is available in the following sizes:

### 4/4 THICKNESS

1" X 4" (NET SIZE 3/4" X 3-1/2" X 6' LONGER)

1" X 6" (NET SIZE 3/4" X 5-1/2" X 6' LONGER)

### 5/4 THICKNESS

1-1/4" X 4" (NET SIZE 1-1/16" X 3-1/2" X 6' LONGER)

1-1/4" X 6" (NET SIZE 1-1/16" X 5-1/2" X 6' LONGER)

Custom milling available to any specification. Please contact us for custom sizes or special orders.
