Teak Tiles

Teak deck tiles from East Teak Fine Hardwoods, Inc. are an easy way to transform your outdoor space. Whether for remodeling or new construction, teak deck and patio tiles:

- are easy to install in small areas
- offer an elegant solution, whether permanent or temporary
- update old cement patios and wood decks
- cover over existing concrete decks or balconies

East Teak uses only high-quality, kiln-dried, Indonesian plantation teak that:

- is very durable, with natural oils that repel water and prevent the wood from warping, cracking or becoming brittle
- contains natural substances that repel termites, marine borers and other insects
- requires little maintenance and ages to a silver patina if left unfinished
- can maintain a golden teak color with the application of teak oil or other sealer

You can choose from either straight or diagonal tiles, which can be laid out simply or in creative patterns:

STRAIGHT SLATS

SLAT WIDTH	1.25" BOARDS
AVERAGE WEIGHT (PER TILE)*	7.0 LBS.
LENGTH	19.685" (500 MM)
WIDTH	19.685" (500 MM)
HEIGHT	1.22" (31 MM)
SURFACE AREA	2.7 SQ. FT.
FINISH	UNFINISHED

DIAGONAL SLATS

SLAT WIDTH	1.75" BOARDS
AVERAGE WEIGHT (PER TILE)*	8.25 LBS.
LENGTH	19.685" (500 MM)
WIDTH	19.685" (500 MM)
HEIGHT	1.22" (31 MM)
SURFACE AREA	2.7 SQ. FT.
FINISH	UNFINISHED

*Wood is a natural product and individual tile weights will vary slightly

East Teak's decking tiles can easily be installed by homeowners or professionals. I-Connect offers a unique, easy way to connect hardwood tiles. These connectors grip tiles together with a system of simple holes and pegs, and can be separated into halves or quarters to accommodate the edges of your installation. I-Connect:

- is made of durable plastic
- is 5/32" thick
- allows tiles to avoid direct contact with the surface

Ipé Tiles

An exotic hardwood that is naturally resistant to rot and decay, ipé offers the durability of teak at a moderate price. Ipé tiles can be installed as either a permanent or temporary wood surface.

Ipé tiles are ideal for a wide range of uses:

- over existing concrete condo or apartment balcony
- on existing wood deck or cement patio
- roof deck
- walkway
- landscaping feature
- vacation property

Ipé tiles age to a silvery gray patina, or you can maintain their rich dark-brown color by applying a penetrating wood sealer. Ipé tiles feature a straight slat layout:

SLAT WIDTH	2.625" BOARDS, NON-SLIP GROOVED
AVERAGE WEIGHT (PER TILE)*	12.5 LBS.
LENGTH	19.685" (500 MM)
WIDTH	19.685" (500 MM)
HEIGHT	1.18" (30 MM)
SURFACE AREA	2.7 SQ. FT.
FINISH	UNFINISHED

**Wood is a natural product and individual tile weights will vary slightly*

When installing ipé tiles, ensure that surfaces are stable:

- existing wood decks need to be in good structural condition
- you can also install over packed gravel that offers good drainage
