

EAST  TEAK  
FINE HARDWOODS, INC.

*America's premier source for fine hardwood products since 1972*

# Innovation, richness, beauty

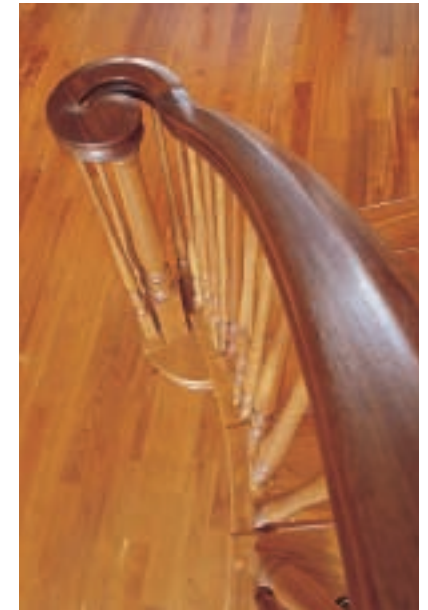

FROM SHIP TO SHORE, EAST TEAK FINE HARDWOODS, INC. PROVIDES THE  
HIGHEST QUALITY TEAK AND FINE HARDWOODS FOR YOUR BUILDING PROJECTS

It all started with rough-sawn teak lumber. This single shipment purchased in 1972 eventually led to an unmatched network of international contacts and hardwood sources that has grown to become East Teak Fine Hardwoods, Inc.

The company began with a focus on boat builders, ultimately earning status as a preferred supplier for numerous major marine manufacturers. East Teak then revolutionized boat building by offering finished custom mouldings and millwork on a just-in-time basis. This created dramatic efficiencies for customers and became the new industry standard. East Teak then moved beyond the shipyard, expanding its cutting-edge services to architects, designers and builders across all industries.

Today, the company is the leading supplier of First European Quality teak and exotic hardwoods for construction and renovation of:

- ◆ residences, both interiors and exteriors
- ◆ commercial buildings, including boardrooms, courthouses and concert halls
- ◆ hotels, from lobbies to restaurants
- ◆ boats, both decking and interiors

## CUSTOMERS RELY ON EAST TEAK FOR:

Rich, durable woods that are attractive, unique, properly kiln-dried and inspected

First-class service, including advice on which species best fits a particular project and climate

Custom millwork that fits exact specifications

A large inventory of products available for immediate delivery

EAST TEAK PROVIDES A FULL RANGE  
OF WOOD SPECIES, INCLUDING:

**TEAK**, legendary for its beauty and durability, ideal for marine, residential and commercial decking, flooring and finish work

**IPÉ**, widely recognized for its strength and durability, popular for exterior decking, bridges, boardwalks and interior flooring

**AFRORMOSIA**, a dense, extremely versatile wood with a natural polished look, great for all millwork including interior flooring, doors, windows and trim

**MERBAU**, an attractive red-brown wood, perfect for flooring and interior finish work

**SAPELE**, a medium to dark African mahogany, ideal for flooring, decorative cabinetry and mouldings

East Teak goes beyond the best woods, offering custom millwork to fit exact specifications, reveal a special grain and minimize waste. Custom millwork includes surfacing, re-sawing, mouldings, straight-line rip and more.

# Fine woods, tailored cuts

CUSTOM MILLING AND SUPERIOR MATERIALS  
ADD BEAUTY AND RICHNESS TO EVERY PROJECT

Few building materials possess the natural, inherent and long-lasting attractiveness of teak and exotic hardwoods. East Teak Fine Hardwoods takes full advantage of these qualities to create:

- ◆ custom architectural mouldings
- ◆ hardwood flooring and paneling
- ◆ decking for commercial, residential or marine applications
- ◆ ship timbers

East Teak imports First European Quality teak, the highest grade available. What's more, the company works directly with architects and builders to determine their specific requirements and to manufacture materials that meet their exact needs.

East Teak offers an unmatched selection of hardwoods. Each is chosen for its beauty and quality.

Unlike their softwood cousins, hardwoods are:

- ◆ naturally durable
- ◆ higher in density
- ◆ richer in color
- ◆ equally appealing for residential and commercial projects

## PROJECT SPOTLIGHT

Architect William J. Chester from Bainbridge Island, Washington re-designed this exquisite teak boathouse for a major renovation on the beach of Bainbridge Island. All teak was directly imported by East Teak Fine Hardwoods, Inc.

# Inside, outside, in between

WHERE EVERY FLOOR, DOOR, MOULDING AND DECK IS A WORK OF ART

Adding richness and warmth to any room — indoors or out — is as simple as choosing the right hardwood.

East Teak supplies:

- ◆ elegant flooring in a variety of styles and treatments
- ◆ standard and custom mouldings
- ◆ teak and exotic decking
- ◆ teak and ipé deck tiles
- ◆ a full range of marine products, including ship building timbers, decking, plywood and fancy teak cabin sole

With exotic woods and incomparable craftsmanship, East Teak can bring unparalleled style to:

- ◆ *Residential design.* Teak and exotic hardwoods add depth, beauty and style to new construction and renovations with exposed ceiling beams, custom cabinets, flooring, windows and doors, outdoor decking and walkways.
- ◆ *Commercial design.* Long-lasting, lovely woods complete a rich, inviting and cutting-edge design for board rooms, offices, concert halls, municipal buildings, restaurants and more.
- ◆ *Hospitality design.* A range of products provide unique beauty and lasting quality for lobbies, guest rooms and suites, restaurants and bars, pool and spa decking, and walkways.
- ◆ *Marine applications.* Teak is the standard of excellence with yachts and superior watercraft for all decking, doors, hatches and cabinetry.

# Green solutions

## RECLAIMED SUSTAINABILITY IN ANCIENT BEAUTY

East Teak offers an eco-friendly, “green” solution – recycled and reclaimed prime-grade teak and rosewood.

These woods are responsibly recovered from old and neglected structures, typically 60 to 100 years old. Careful hand grading ensures the highest quality and reusability of the wood.

Each piece of wood has a special history and story to tell. As a result, East Teak provides access to materials with unique character and beauty:

- ◆ striking coloration resulting from natural forest growth and decades of air drying
- ◆ a wide range of shapes and sizes
- ◆ incredible stability, as well as resistance to temperature changes and weather elements, thanks to long seasoning time
- ◆ rich, natural oils that make the timber extremely durable

In helping to preserve the environment, any project will look spectacular with recycled teak or rosewood – while keeping our forests intact.

## PROJECT SPOTLIGHT

Located a short distance inland from Carmel by the Sea, this magnificent California estate features teak doors, ceilings, windows, cabinets and mouldings. New York-based Peter Pennoyer Architects, PC designed the estate. East Teak custom milled the mouldings and supplied rough lumber and plywood for the home’s interior finish work, which was completed by The Skomsvold Group of Fresno, CA. The project was crowned with interior decorating by The Weisman Group Interior Design Inc. of San Francisco.
